

SPLITTER WYES — Equally divide the air flow to direct heating and cooling to needed area. Most sizes available.

STRAIGHT WYES — PLYCO's economical solution to dividing the air flow. Most configurations are available. **(Call for Part Numbers)**

BOOT BOXES — Torpedo, Side and Straight Boot Boxes are constructed of 28 gauge galvanized steel. These boxes are the most efficient way to transfer air around a tight corner, with less noise and vibration.

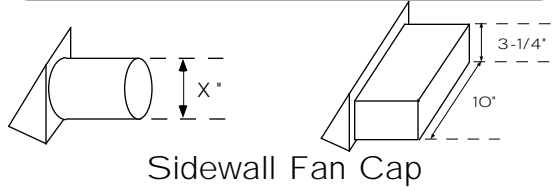

B- and C-BOXES — PLYCO B-Boxes are made with special construction that allows the contractor to use the same product for most register needs. The end tab can be folded out at 90° or back against the box body. The tab can also be folded on the perforation to insert for mounting. These Ceiling/Floor Boxes are constructed from 28-gauge galvanized steel.

Boot Boxes:

Part nr.	Description	pk	wt.
